Warranty: 1 Year

Made in United States

Jonli-Craft® Wood DUPLO® Short Square Table With Dual Storage - 5363JC

Young kids play hard, and the best classroom furniture keeps up without creating extra work for the adults in the room. The Wood DUPLO® Short Square Dual Storage Table is designed with both in mind, pairing a low, toddler-friendly height with two built-in mesh storage bags that keep DUPLO® bricks organized throughout the day and simple to clean up when play is done.

Four color DUPLO® base plates cover the Baltic birch wood frame, giving little ones a visually inviting surface to build and explore on. The dual storage design means there is always enough brick storage for a full group of kids, with each bag keeping its supply contained and within easy reach so play can flow without interruption.

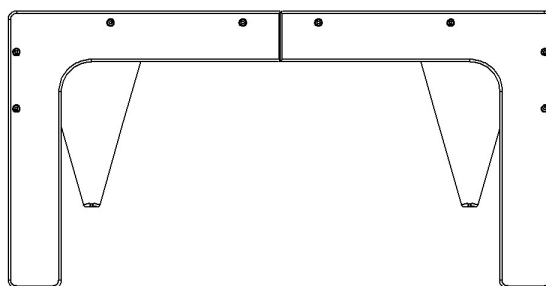

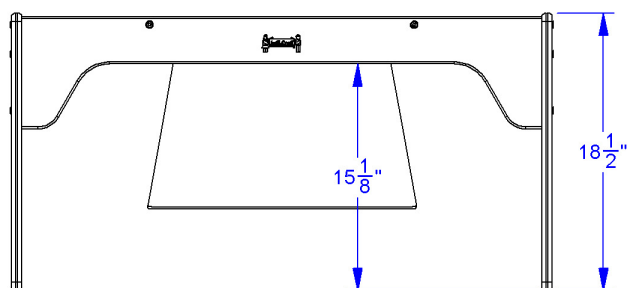

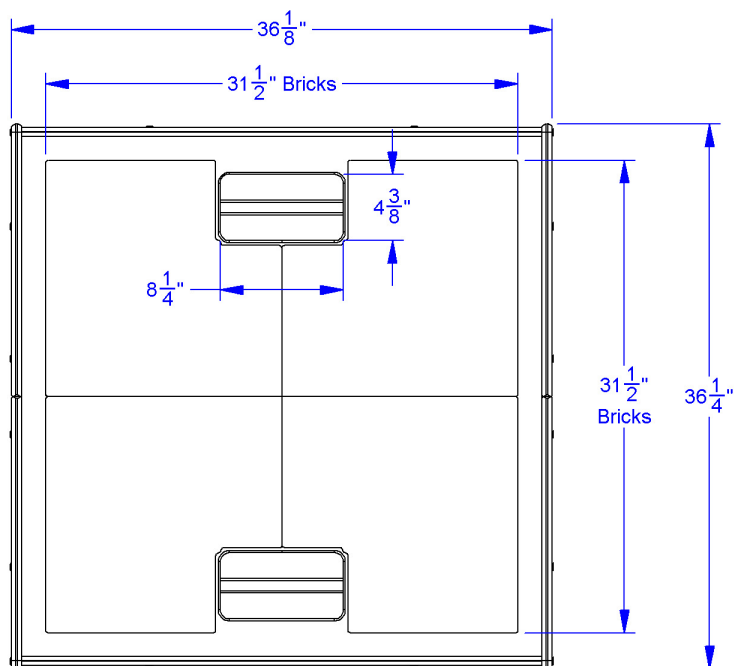

When the session wraps up, both Velcro closures snap shut quickly and each bag lifts off the table independently for washing. For teachers and caregivers managing busy schedules in schools and daycare centers, that kind of no-fuss cleanup makes a genuine difference at the end of the day.

The low height is a natural fit for toddlers and preschool-aged kids, putting the DUPLO® base plates right where little hands can reach them comfortably. The clear-finished Baltic birch wood construction adds warmth to any activity table area while holding up to the daily demands of active young learners in childcare centers and early childhood classrooms.

Thoughtfully designed and built to last, it is a DUPLO® storage table that works as hard as the kids playing at it.

JonTi-Craft® Wood DUPLO® Tall Square Table With Dual Storage - 5366JC

As kids grow, their play gets bigger. The Wood DUPLO® Tall Square Dual Storage Table is built to match, offering a taller frame that suits preschool-aged children who are ready for a more comfortable height at their DUPLO® table, along with two built-in mesh storage bags that give any classroom or daycare more brick storage right where it is needed.

Four color DUPLO® base plates set into a clear-finished Baltic birch wood frame create an attractive, durable surface that kids are naturally drawn to. The taller height lets growing kids sit comfortably and engage fully with the table without the surface feeling too low, while the generous square shape gives a group of builders plenty of room to spread out and play together.

The dual mesh bags keep DUPLO® bricks sorted and accessible throughout the session, so kids spend their time creating rather than searching. Each bag closes with a Velcro fastener and detaches from the table independently for washing, making cleanup fast and straightforward for teachers and caregivers at the end of any school day.

Baltic birch wood construction ensures this DUPLO® storage table handles the daily demands of active kids in schools, daycares, and childcare centers without wearing down. The natural wood finish brings warmth to any activity table area while standing up to consistent, heavy use over time.

Double storage, a comfortable taller height, and lasting wood quality make this a DUPLO® table worth coming back to every day.
