Made in United States

JonTi-Craft® Wooden Kids LEGO® Square Short Storage Table - 5359JC

Group building moments are some of the best in any classroom. The Wooden Kids LEGO® Square Short Storage Table gives a group of young builders room to spread out and create together, with a generously sized square surface covered in four color LEGO® base plates set into a clear-finished Baltic birch wood frame.

The lower table height puts kids right in the action, making it easy for little ones to reach across the surface, collaborate, and stay engaged throughout play. It works equally well in a daycare activity area, a classroom building center, or any space where LEGO® play is part of the daily routine.

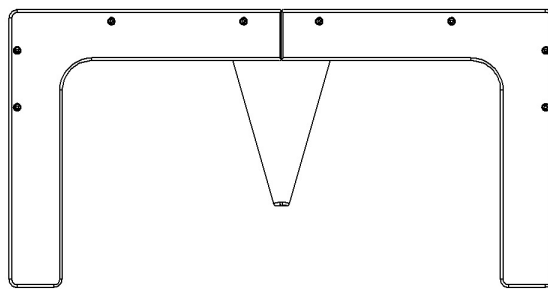

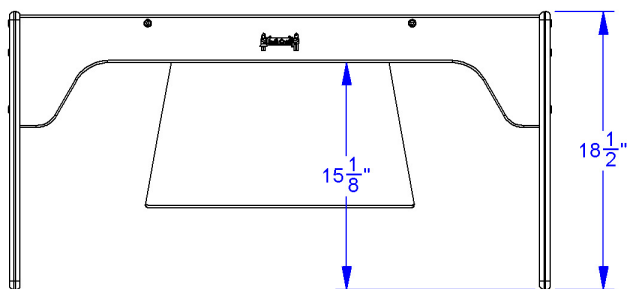

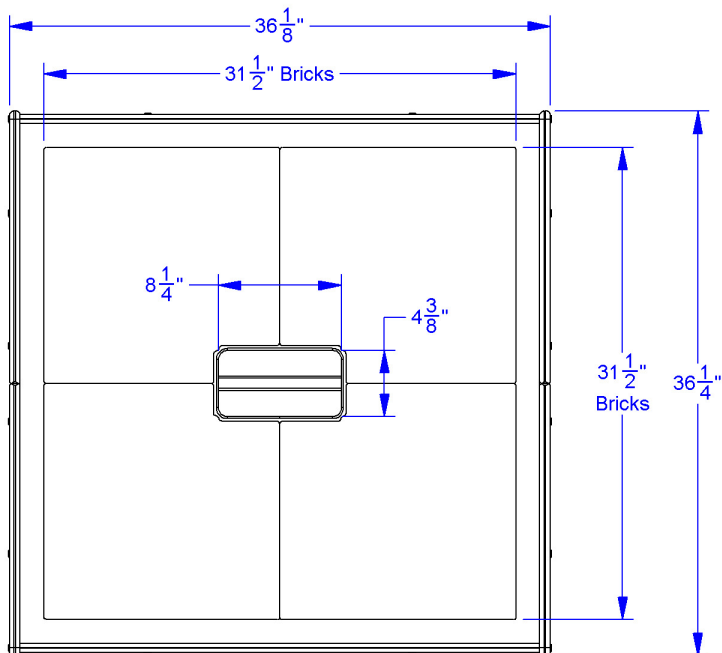

Built-in mesh storage keeps the experience running smoothly from start to finish. Kids have easy access to extra LEGO® bricks throughout the session, and when play wraps up, the Velcro closure seals the bag shut for a fast, no-fuss cleanup. The bag detaches from the table entirely for washing, so maintaining it is never a chore.

The Baltic birch wood construction brings durability and natural warmth to any learning environment, holding up to the daily energy of active kids without losing its appeal. Whether it anchors a dedicated LEGO® table zone or rotates through different activity table setups, it is built to handle consistent use in schools, classrooms, and daycares.

A larger square surface, smart storage, and solid wood quality make this one of the most versatile LEGO® tables in any early childhood setting.

JonTi-Craft® Wooden Kids LEGO® Square Tall Storage Table - 5361JC

When kids have more room to build, they build bigger. The Wooden Kids LEGO® Square Tall Storage Table pairs a generously sized square surface with a taller frame, making it a comfortable fit for older kids who need a little more height at their LEGO® table. Four color LEGO® base plates set into a clear-finished Baltic birch wood frame give young builders a bright, attractive surface to work with in any classroom or daycare activity area.

The extra height makes a real difference for kids who have grown past lower activity tables but still want dedicated space to create and build. It sits comfortably alongside other classroom furniture without feeling out of place, blending natural wood warmth with the practical needs of a busy learning environment.

Built-in mesh storage keeps the play experience organized from start to finish. LEGO® bricks stay within easy reach throughout the session, and cleanup is simple when the time comes. The Velcro closure seals the bag quickly and the bag detaches entirely from the table for washing, making it easy to keep the space clean and ready for the next group of kids.

Baltic birch wood construction gives this LEGO® storage table the durability to handle daily use in schools, daycares, and childcare centers without wearing down. Whether it serves as the centerpiece of a dedicated building zone or works within a rotating activity table setup, it is built to last through years of enthusiastic play.

A taller build, smart storage, and quality wood construction make this a LEGO® table worth investing in.
