Made in United States

JonTi-Craft® Wood DUPLO® Rectangle Storage Table - 5352JC

Little builders deserve a table built for them. The Wood DUPLO® Rectangle Storage Table is sized and designed with toddlers and younger kids in mind, bringing the joy of DUPLO® play to classrooms, daycares, and early childhood spaces with a setup that teachers will appreciate just as much as the kids.

Four color DUPLO® base plates sit in a clear-finished Baltic birch wood frame, creating a bright, inviting surface that encourages kids to build, create, and explore. The sturdy wood construction keeps up with the energy of young learners while adding natural warmth to any activity table area.

Storage is built right in. A removable mesh bag hangs beneath the table surface, keeping DUPLO® bricks within easy reach during play and organized when the session is done. The Velcro closure lets you close the bag shut and pull it off the table entirely for a quick wash when needed. No loose bricks rolling across the floor, no lengthy cleanup for caregivers.

At 36" wide by 20" deep, this DUPLO® table gives young kids plenty of room to spread out and build alongside each other, supporting the collaborative, hands-on play that is central to early childhood development. It fits naturally into any classroom or daycare activity area without taking up more space than it needs to.

Purposeful, easy to maintain, and built to last, it is a DUPLO® activity table that earns its place in the room every single day.
