Item: 5356JC

MSRP Price: \$609.99

31" W x 31.5" D x 18.5" H

Ship Weight: 32 lbs

Warranty: 1 Year

Made in United States

JonTi-Craft® Wood DUPLO® Square Storage Table - 5356JC

The youngest builders in the room need furniture that keeps up with them. The Wood DUPLO® Square Storage Table brings together a sturdy Baltic birch wood frame, four color DUPLO® base plates, and smart built-in storage to create an activity table that works from the first brick placed to the last one put away.

DUPLO® play thrives when kids have easy access to their bricks and a defined space to build. The square format provides just that, giving toddlers and young kids a focused area to create and explore while the mesh storage bag keeps extra bricks close at hand throughout play. There is no digging through bins or searching across the room, just building.

When the activity is over, the Velcro closure draws the bag shut in seconds. The bag then detaches from the table completely for washing, making cleanup as easy for caregivers as the play was for kids. It is the kind of practical detail that makes a real difference in a busy daycare or classroom setting.

Clear-finished Baltic birch wood gives this DUPLO® table a clean, natural look that fits comfortably in any early childhood space. The wood construction is solid enough to handle active young learners without wearing down, making it a reliable addition to any classroom or daycare activity table area.

For schools and childcare centers looking for a DUPLO® storage table that is as easy to manage as it is enjoyable for kids, this is a well-considered choice that delivers every day.
