MSRP Price: \$449.99

36" W x 20" D x 18.5" H

Ship Weight: 25 lbs

Warranty: 1 Year

Made in United States

JonTi-Craft® Wood LEGO® Rectangle Storage Table - 5351JC

Building is the easy part. Cleanup is where most LEGO® tables fall short. The Wood LEGO® Rectangle Storage Table solves that problem with a built-in removable mesh bag that keeps bricks contained during play and makes tidying up at the end of the day simple for teachers and kids alike.

Four color LEGO® base plates are set into a clear-finished Baltic birch wood frame, giving this activity table an attractive, classroom-ready look that holds up to daily use in schools, daycares, and childcare centers. Kids can build directly on the base plates while the mesh bag below keeps extra bricks organized and within easy reach.

When play is over, the Velcro closure cinches the bag shut and the whole thing detaches from the table for washing. No hunting for scattered bricks, no complicated cleanup routines, just a quick and easy reset so the space is ready for whatever comes next.

At 36" wide by 20" deep, this LEGO® table provides enough surface area for small groups of kids to build together, making it a great addition to any classroom makerspace, play center, or daycare activity area. The wood construction is sturdy enough to handle the demands of busy learning environments while keeping the natural warmth that fits well in any space.

Durable, organized, and easy to maintain, it is everything a LEGO® activity table should be.
